Entered at the postoffice in Tonopah as second class matte

### CHANGE OF ADMINISTRATION

AU THAT a change of administration for the county is due about the first of the year is certain. The campaign has opened and, after a careful scrutiny of the issues, it appears the old county administration is divested of all rights to continue the succession Co that has been so carefully coddled around the courthouse. Nothing Cr has been done to show for the hundreds of thousands spent by Bl elected officials who grow fat and sleek at the public crib for want of exercise and through the patience of the public. Nye county is one of the few counties where the taxes will be increased Gr this year. From every side come reports to the effect that other Gr counties have found it NECESSARY TO REDUCE TAXES. Ny Ju county offers the plea that this is election year and therefore the to cost of administering county affairs calls for an extra levy. Other On counties have the same expense to meet, but their commissioners. through prudent management, have succeeded in cutting down snexpenses in other lines so the extraordinary outlay for campaign Spycars is absorbed without adding to the burden of the taxpayers. (By Associated Press. YeLast week the Bonanza showed where Lovelock and Winnemucea illegitimate sons of the late King tion; had tried the stage, but had were both to profit by a reduction of from 20 to 25 per cent in the Milan of Serbia, known as the Chris- been ruled off by the police because Milevies of these towns, where the greatest gains are credited to the tich brothers, who have been pre- he had billed himself as a prince; Weounty management. Now comes Churchill county with a flat tenders to the Serbian throne, is now and finally turned to waiting on table reduction of 20 per cent. The decision is expressed in the following a waiter in a dining car running be because he knew of nothing else he Miresolution, adopted unanimously:

"It appearing to the satisfaction of the board that the assessment Re of the real estate and improvements throughout the county was too Christich brothers. high, it was ordered that the assessed valuation throughout the county on real estate and improvements be reduced 20 per cent, one of these boys, whose mother was Bexcept in cases where the valuations are set by statutes or the the beautiful Artemesia, to his life-Nevada Tax commission."

For a further comparison it may be stated that the budget of Budapest. The latter for years treat authorities. The Vienna correspond-Churchill county called for \$89,000 to cover the prospective expenses for the year 1916, compared with 1915, when the cost of adminis- and then died without remembering tration of the county was only \$67,035. Humboldt county asked him in his will or without making ported by a London newspaper to be for \$273.820, against \$285,300 the previous year. NYE COUNTY any provision for him. Thus falling ASKED FOR \$263,000, IN ROUND FIGURES, AGAINST \$127,000 suddenly from comparative affluence IN 1915, AN INCREASE OF OVER ONE HUNDRED PER CENT. to poverty, the man dropped out of a salary of \$15 a week. In January

Remember this. Cut the figures out and remember them when you go to the polls in November. This campaign is a fight for the Budapest to Vienna, and who knew the yacht Erin, saying he was deprotection of your home, and there is no doubt but that the the Christich brothers in the old days sirous to fight for his country, but householders of Tonopah and Nye county will place themselves on when Count Zichy was alive, was Sir Thomas refused his request, and Mrecord against such a reign of extravagance as that which calls surprised to find that the waiter who so far as known he is still in Eng-Rfor a levy of \$4.01 on every \$100 to defray the cost of maintaining 10this town and county.

### TUNGSTEN IN ITS INFANCY

THERE is no reason why those who have located tungsten T claims should grow despondent over the possibilities of the future. Never has there been such a bright outlook. The industry CASH BOY CONSOLIDATED MINING the Bonanza. Price \$1.25. that was supposed to be a mere adjunct to the greater steel production is now likely to prove one of the most potential factors in the manufacture of steel rails and other forms of steel products where great tensile strength is demanded at a moderate cost. This development has come through the discovery by an eastern scientist that the tempering of the ends of rails with tungsten imparts a 10certain resilience that reduces the possible fracturing qualities to a minimum. This has been established through a long series of trials, and the big trunk lines now are placing orders for tungsten tempered rails. This implies the consumption of tens of thousands tons of the black metal, which was regarded as a curiosity a year ago, and means a constant and ever increasing demand that will tax the resources of every tungsten mine in the country to supply. It was not so very long ago that the leading tungsten mine operators thought they held the whip hand over the steel companies that needed their product in the manufacture of tools for the making of war munitions, but when the allies began shipping in tungsten from South America the market speedily underwent a change, and instead of paying \$110 per unit the buyers dropped back to \$18 and \$20 per unit. This took the wind out of the sails of all except those ofnot favorably situated with the best facilities and cheapest labor infor continuing production and caused a setback to the hopes of thousands of prospectors who went into the hills to look for deposits The metal that paid a princely fortune for every carload landed at the eastern steel plans. This dampening depression resulted in a crestricted output, which, at last, has begun to show an improvement imounting to a steady gain. In a quiet way contracts for the lelivery of large tomage have been signed and the secret of the apuyers has been preserved so well that it was only within the past mlew weeks that the truth leaked out. Tungsten will now become a standard metal, with a fixed value around \$25 and \$30 per unit. and at that rate there is no reason why the man with ore ranging from one to three per cent should not accumulate a fortune. At sahese prices a ton of 60 per cent concentrates would realize from J.\$1500 to \$1800, which carries a greater margin of profit than a bigold-silver ore averaging \$15 to \$20 a ton. There is no reason for anyone owning tungsten claims to grieve over the prospect, and infter the first shock is over, it will become apparent to all except hose who expected to take a short cut to affluence that the world a not as had as it is painted. Nevada is doing gloriously well for 27; state that was without a single tangsten mine one year ago, for ecording to the United States reports the production for the first salf of the year was over \$1,500,000, notwithstanding the imperfect Phystem of reports.

"Dominant Americanism" is the bone of this campaign as recinctly expressed by Governor Hughes. That slogan has the ght ring to it and one that will be heard from on November 7

Selby Smelting works. Sacked ore is piled all over the hills here waiting for teams to haul it to Sodaville. If ore continues to come out of the mines the way it is coming at present it will take about three railroads trains every day to transport it.

The prospect of extending the railroad into camp is gradually becoming a reality instead of a dream. The Southern Pacific officials state that the road has a \$15,000,000 surplus and they are looking for territory that will pay back all the money invested. The management of the road is now considering the advisability of such

# ENGLISH CHEMISTS MAKE DISCOVERIES

EDINBURGH, Scotland, August 19. The three days' session of the annual meeting of the Society of Chemical Industry showed that the chemical industry of Great Britain would in future largely break away from its dependence on Germany and other countries so far as dye and fine chemicals are concerned, and at the same time brought out prominently the need for still further research and development on the part of Britishers generally.

Papers were read indicating the enormous waste of by-products of itself was wasted in some pits, per cent in others and 40 per cer lost in certain Doncaster pits.

On the subject of tar distillation a process yielding about a dozen chemical products-a speaker stated that the industry had suffered from lack of co-operation and that more scientific attention with a central research laboratory were required to recapture the fine chemical and color trade from Germany.

RUSSIA AND JAPAN UNITE TO BUILD TRADE

By Associated Press.)

TOKIO, August 19.—Announcement of the Russo-Japanese convention has been followed by the visit to Tokic of Peter Julievitch Schmidt, secreary of the Russian Chamber of Exsort, who will study ways and means of stimulating Russia's permanent ex port trade to Japan.
